EUROVAN A/S 365 COMPETENCE IN EVERY SEASON

THE ALL-SEASON VAN TYRE OPTIMISED FOR DRIVING IN SUMMER AND WINTER.

High performance on wet roads

The Eurovan AS 365 features advanced step-sipes with a prolonged edge length to ensure safe performance on wet roads. Equipped with wide lateral shoulder grooves that allow efficient water drainage, the pattern is highly resistant to aquaplaning and achieves short braking distances on wet roads.

Strong braking performance on snow

Pockets trap snow inside the tyre's tread which significantly improve the grip thanks to a much better traction of snow to snow than rubber to snow. Step-shaped groove edges enhance traction even more for extra braking performance on snowy roads.

Excellent driving stability

The pattern provides excellent driving stability and safe cornering in all weather conditions. A ribbon structure with tie bars in the centre ensures excellent directional stability. The handling rib in the shoulder improves the stiffness distribution for enhanced vehicle dynamics to put safe cornering into practice - on dry, wet and snowy roads.

TYRE PERFORMANCE EUROVAN A/S 365 VS EUROVAN WINTER 2

Rim diameter	Size	Load / Speed Index	C	A	73/2
